<b>WDID No</b>	6A291508008
<b>Applicant Name</b>	Mike Isle, Stonebridge Properties, LLC
<b>Agent</b>	Kate Wheatley
<b>Project Name</b>	Coldstream Specific Plan Project
<b>Receiving Water Name</b>	Cold Creek
<b>Project City</b>	Town of Truckee
<b>Project County</b>	Nevada
<b>Status</b>	Received
<b>Project Purpose and Description</b>	Development of 10 acres of commercial uses, 61 acres of residential uses, 109 acres of recreational and open space uses (trails), and 2.95 acres of off-site improvements, including recreational trails and traffic roundabouts. Also included in the Project are restoration components: construction of a 1.91 seasonal wetland, removal of large industrial berms separating the pond areas to create additional open water and habitat opportunities, creation of habitat islands in the ponds to provide refuge for nesting waterfowl and shorebirds, recontouring the pond fringe areas to create emergent marsh habitat, restoration and enhancement of a section of Cold Creek, and replacement of an existing bridge over Cold Creek to improve flow and reduce erosive effects of the current bridge.
<b>Date Received:</b>	8/18/2015

<b>WDID No</b>	6A311406004
<b>Applicant Name</b>	Northstar Community Services District- Mike Staudenmayer
<b>Agent</b>	Markus Lang
<b>Project Name</b>	Martis Valley Trail- Segment 1
<b>Receiving Water Name</b>	Martis Creek
<b>Project City</b>	Truckee
<b>Project County</b>	Placer
<b>Status</b>	Pending/Incomplete
<b>Project Purpose and Description</b>	A ADA compliant bike trail will be built adjacent to State Route 267. The northern trailhead would be located at the County line (southern limits of the Town of Truckee). The trail will head south and east from the trailhead. The trail will meander adjacent and roughly parallel to the State Route 267 but with design intent to remain well separated from the highway corridor for safety and aesthetic reasons. This segment of the trail will be constructed following topographic and other natural feature, as there are no existing trails to follow. An unavoidable wetland swale exists that the proposed trail will cross. The crossing over the wetland will consist of post and pier type boardwalk approximately 60 feet in length. No changes in the streambed slope are anticipated. Post would displace some soil and vegetation within the swale. No equipment will be stored in or near the swale and construction mats will be used to avoid damage to the swale outside of the posts and footings. No dewatering will be necessary as the work is to be done in the dry season.
